

Appl. No.: 10/692,273

MAY 30 2012

Amendments to the Specification:

Please amend the paragraph on page 5, column 1, lines 8-15 as follows:

From patent document [WO 95/00374] WO 96/39762 it is known a camera integrated into a mobile communications device, wherein the lens of the camera is always exposed like in a normal camera or is brought out from beneath a keypad, being thus protected when the camera is not in use. The lens is released e.g. by moving or lifting the keypad and returned to its place at the same time as the keypad is returned to its place.
